Why join Ogilvie Construction?

Ogilvie Construction Ltd deliver building projects in both the public and private sector. We are a multi-skilled organisation and pride ourselves on our people and recruiting the best talent. We provide a rewarding and challenging working environment for all our employees, and we understand the benefits of a talented workforce.

Due to the on-going success of our developments in Aberdeen, we have an opportunity for a Senior Quantity Surveyor to join our team.

The Role:

Joining the team of Contract Surveyors, you will be responsible for managing commercial aspects of projects and identifying opportunities for increasing profit margins.

- To undertake the day to day commercial/surveying activities of allocated projects
- Continuous liaison with the Project Manager to ensure understanding of commercial matters relating to the project and support successful operational delivery
- Development of project cost plans and working closely with the design team and operational colleagues through the pre-construction process
- Procurement of subcontract work packages, issuing detailed tender reports in advance of subcontractor appointments
- Measuring and valuing works carried out on site
- Formulation of monthly valuations, commercial reporting, the identification and valuation of variations and the control of expenditure
- Recognise H&S, risk and margin when carrying out all works
- Ensure adherence to sub-contracts and assist with sub-contractor payments

About You:

Do you:

- Have an honours degree in Quantity Surveying?
- Have at least 5 years Construction experience in a Contracting Quantity Surveying role? *‘preferred’*

Are you:

- Experienced with Microsoft Excel and Word?
- Able to work independently and manage own workload but also work effectively as part of a team?

Training & Progression:

It is anticipated that our growing business will provide the opportunity for you to develop into a role with more responsibility. The company can also assist successful candidates in achieving their RICS APC.
